Dear Hansen, David, and John,

I know that you often hear air quality concerns at EJ Task Force mtgs and from concerned members of the community elsewhere. I wanted to remind you that the Navy is doing cleanup work at the Parcel E-2 landfill (attached are public handouts that Jackie & I have brought to previous EJ Task Force mtgs). Many thanks to Nina Bacey at DTSC for making arrangements to do dust monitoring during the landfill construction activity. I wanted to make sure that you are connected with each other. Nina is the Remedial Project Mgr for Hunters Pt for DTSC.

Dear Nina,

Hansen Rodriguez is the BAAQMD inspector who has gone with us on many inspections. David Ralston is the head of community engagement who attends all EJ Task Force mtgs. John Marvin is manager of enforcement for BAAQMD with Hunters Point in his group. He also has often attended EJ Task Force mtgs.

Well, it has finally begun. Now that the Navy contractor has re-mobilized and my IH's have everything they requested from me of the site, we have begun dust monitoring. Michael went out Monday and Eric will go out Thursday. They plan to stick to the perimeter, and monitor twice a week if possible, for a short period. Just kind of a spot check to make sure the contractor is using dust controls and verify they are working. See attached.
